

Smart Mirror Cabinet Instruction Manual

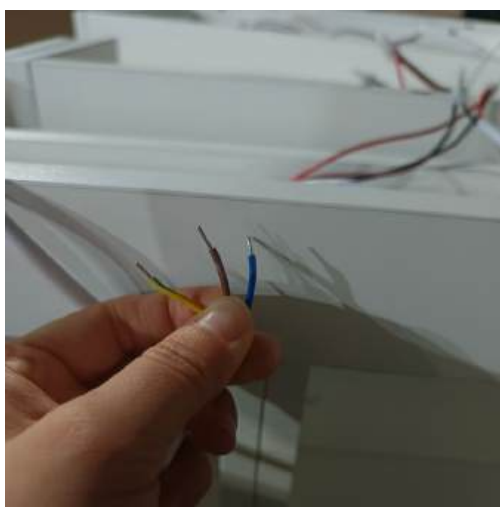

- 1.** Touch the sensor button: first tap for white light, second tap for warm yellow light, third tap for neutral light, tap again to turn off the light.

- 2.** Inspect the power supply position. If the switch and light strip fail to light up, first check for incorrect wiring, then test whether the transformer is burnt out.

- 3.** If the switch and light strip fail to light up, first check for incorrect wiring, then test whether the transformer is burnt out. Yellow is the ground wire, brown is positive, and blue is negative.

- 4.** If the switch or light strip fails to light up, check if the hinge is loose; the hinge hole and wire hole must align at the same position.
