Discover your Senses in Sustainability and Purity

GETTING TO KNOW US

MERCIO originated in Australia and focuses on quality and trendy bathroom products. We continuously explore new bathroom concepts that offers a wide range of ergonomic products for your bathroom. We manufacture more than 1000 items of bathroom products and promise to provide functional & efficient products in creating your ideal home concept. Beyond providing a wide range of bathroom products, it is also our core mission to provide a good service to our customers. We provide trendy bathroom products that emphasize aesthetics, functions, and durability. They are exquisitely designed as a true reflection of your lifestyle. An extensive line of top quality products ensures that there is something right for you – whether it's design, space or style. We are always improving our designs to meet your needs and expectations of a perfect home. You can also enjoy our generous warranty periods for an added peace of mind.

DESIGN

Design that surrounds us affects how we feel. Design is emotion. That is why our philosophy is that design needs to adapt to people's needs in terms of aesthetics, functionality and sustainability in its production and use.

FIND A STORE

MERCIO has 45 distribution points across the country, located in and around New South Wales.

EXCELLENCE

Creating sophisticated products requires a high degree of technical expertise combined with manual craftsmanship. This is something we practice at our development centres and production plants at more than ten locations around the world. Here, our employees develop and manufacture our products using state-of-the-art technologies, artisanal skills, and meticulous attention to detail. This aspiration to achieve the ultimate excellence is deeply rooted in the company.

WELLBEING

We see the bathroom as a living space where you recharge your batteries, get ready for the day in the morning, and round it off in the evening. Our products and their natural charm create rooms that offer moments of peace, tranquility, and quality of life, creating a sense of stability in a world of ever-changing aspirations and needs. We strive to make every bathroom an entirely personal and unique feel-good place, while, of course, also meeting the highest hygiene and functionality standards.

RESPONSIBILITY

We accept responsibility for our environment and the people living in it – for current and future generations. For that reason, we treat our resources with respect and create a working environment for our employees in which everyone feels comfortable. To accommodate the different living situations and lifestyles of our users, we develop ideas and manufacture products that are highly functional, durable, and sustainable – not least in terms of their use of water.

Pricing

RRP – Recommended Retail Price

All RRPs shown in this magazine include GST.

The RRP for each product is a price guide only. Individual prices are determined by the retailer/stockist and may vary.

Mercio products are available for purchase from leading retailers of bathroom, kitchen and laundry products throughout Australia. For your nearest retailer, please refer to our website: mercio.com.au

Basins

HYGIENE GLAZE

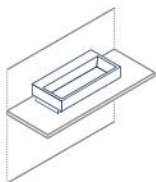

Hygiene Plus Technology

It is important for ceramic products to have a hygienic surface in terms of health and the environment. Mercio offers an easy-to-clean glazed surface through its Hygiene Plus Technology, which applies nano-sized coating at a high temperature of 1280°C on the baked surface. Once the clay and glaze are vitrified and integrated into one, the basin surface becomes smooth, high density, and flat.

Toilets

MERCIO QUIET FLUSH TOILET

1. MOTION OF SILENT, QUIET MOMENT

The manner in which the water flows into the toilet bowl with a swirling motion results in less noise than with conventional toilets.

TORNADO QUIET Flush complies with the DIN 4109 and SIA 181 sound-proofing standards – a real advantage in hotel and housing construction.

2. SAVE UP TO 19,700 LITRES OF WATER A YEAR

The toilet uses only 4.5 litres for a big flush, and a mere 3 litres for a small flush.

This means that a 4-person household can save up to 19,700** litres a year.

3. UNIQUE FLUSHING DESIGN

A powerful swirling water is generated in the conically shaped bowl which effectively removes soiling.

Optimum flushing thanks to powerfully swirling water confirmed by numerous flushing tests carried out by the external testing institute TÜV. TORNADO QUIET FLUSH toilet bowl meets the test requirements with excellent results. It takes just one flush to flush away all test pieces. The brushless future starts here.

4. NO SPLASHING

The controlled swirling water avoids splashing and ensures that almost the entire inner surface area is flushed.

Mercio Torando Toilet

TORNADO XL FLUSHING

MERCIO VERA toilet combines two existing elements in a new way: the Tornado XL flushing system and a unique rim design. This combination enables efficient waste transportation with minimal water consumption, replacing 100% of trapped water with every cycle.

Furthermore, the porcelain undergoes firing at a high temperature of 1240°C to guarantee its hardness. We apply a special glazing formula to shield the WC surface from scratches, making it easy to maintain. Indulge yourself in the aqua lifestyle today.

A unique rim design & flushing system

MERCIO RIMLESS TOILET

Rimless Flushing Technology

MERCIO rimless toilets features patented flushing technology that allows for efficient waste transportation with minimal water consumption. It also replaces 100% of trapped water per cycle to prevent the growth of bacteria. With our Hygiene Plus technology applied to its glazed surface, and designed by our R&D engineers without a flush rim, there are no hidden or hard-to-reach areas prone to bacterial growth and bad odors.

The traditional flush rim has dead corners that are hard to reach and clean, and it is prone to the growth of bacteria. For the hygiene of your family, it's time to invest in a RIMLESS Mercio toilet now.

Easy to clean. A clean and sparkling ceramic surface with one swipe.

Accessible design

As muscle tone reduces, it can become harder to sit down on or stand up from the toilet. That is why we recommend installing it at a higher height if it is a wall-hung toilet or purchasing taller toilets if it is a floor-standing toilet. Of course, they must be fixed securely to the floor or wall. We recommend adding support bars to help to stand up or sit down.

ALL IT TAKES IS A FEW SIMPLE STEPS

For over 50 years, Geberit has designed and manufactured Concealed mounting frames for wall-hung toilets and sinks. The sophisticated Geberit System makes installation quick and easy and maintenance practically nonexistent.

1 Remove the old toilet and tank.

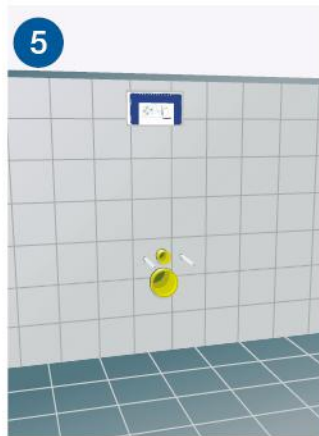

2 Open the wall and floor.

3 Route the drain and supply; prepare the wall studs.

4 Install the tank and carrier.

5 Install the wallboard and wall finishes.

6 Mount the flush plate and wall-hung toilet.

Easy to Clean

With no obstacles on the floor, no tank to clean, and no exposed pipework, a wallhung toilet makes cleaning easy.

Saves Space

The Geberit in-wall system takes up less space than a conventional toilet, and the Concealed installation offers flexibility in small spaces.

Strong and Durable

The wall-hung toilet bolts simply and securely to the mounting frame. This sturdy system holds up to 400 kg.

Saves Water

Geberit dual-flush saves water – a cost-effective solution for the home and a more sustainable concept for the environment.

Easy to Maintain

The Geberit one-piece tank is guaranteed not to leak. The stylish flush plate offers easy access to all internal components.
